REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volumn 2? THE REDCLIFF REVIEW THURSDAY, NOV. 2nd 1933 Number 1

Mr. Frank Britt Chosen as Town Secretary-Treas.

Selection Made at The Special Meeting of Council Monday

At a special meeting of the town council held last Monday evening Mr. Frank Britt was chosen as secretary-treasurer of the town to fill the vacancy caused by the death of the late J. E. Tarrant, who has acted in that capacity for the past eight years.

For a number of years past Mr. Britt has been associated with what is now the Gunderson Brick & Coal Company. For the past two years he has been accountant in the office and is secretary of the company. Although still a young man Mr. Britt has had considerable experience in office work and accounting. As he is a capable, efficient, reliable and painstaking young man there is no doubt he will fill his new position with credit to himself and in the best interests of the town.

He will commence his duties at once.

Local Oxford Group To Meet Regularly

Meetings to be Held Wednesday Evening Each Week

Oxford Group meetings will be held regularly in future every Wednesday evening at 8 P. M. they will be held alternately in St. Ambrose Parish Hall and Gordon Memorial Schoolroom. The gathering next Wednesday to be in the parish Hall.

The meetings take the form of "straight testimony from "changed" people who tell of a totallynew quality of life. The groupers offer no new faith but tell of a revitalized religion which is sending people back to their own churches and giving them a happier view of life.

Over 6000 people packed St. Paul's cathedral this fall when the international team gave witness. The groupers were welcomed by the Archbishop of Canterbury and four leaders of the churches in Germany made a trip by airplane to hear the service. Representatives of all British Universities were present including three hundred from Oxford.

Right Hon. R. B Bennett. Prime Minister of Canada, much impressed with the good influence of the groupers in Canada says: "It is my abiding belief that the influence which you so powerfully exert is the only one which can save the world."

Members of the local team paid a visit to the Medicine Hat Group meeting last Monday night.

Armistice Day, Nov. 11th has been proclaimed a public holiday throughout Canada.

* * *

Mr. G. Puckholt, of Bakner, Man., is at present in town visiting his cousin, Mrs. A. N. Collard and Mr. Collard

* * *

Mrs. Alex. McKenzie, formerly of Redcliff, won the club championship of the Jasper golf club, last week.

Local Militia Elects Officers For Season

Will Train Wednesdays and Recreation Fridays

At a meeting of the local militia held in the Armory last Friday steps were taken in preparation for the carrying on of the social side of the unit during the winter months. For this purpose the following officers were elected:

Hon. Presidents, Capt. Osgood and Lt. Woodcock.

Pres., Sgt. W. Balmer; Vice Pres. Corp. N. Lawson; Social Comrs. T. Lawson, R. Finley, H. Lenning, E. Maskell; and R. Stratton.

It is the intention to hold periodical social functions during the winter.

The unit started training last Wednesday evening.

Friday evening of each week has been set aside for recreation night.

L. A. to Legion Hold Successful Afternoon

Find Ready Buyers For Goods Goods Offered For Sale

The whist drive and sale, held in the I. O. O. F. hall, yesterday under the auspices of the Legion L. A. was fairly well attended.

There were five tables of whist. The first prize was won by Mrs. W. Wheeler, and the consolation by Mrs. Pearson who had to cut with Mrs. R. Moore for this honor.

The draw for the raffle resulted as follows: The machine scarf was won by Mrs. J. Hope, the pillow slip by Mr. B. Allison and the apron by Mrs. Sheasby.

The fancy articles and home cooking found ready sale, so the auxiliary consider the day in general quite a succes.

An entertainment for all members of the local Legion will take place in the club rooms on Saturday, Nov. 11th. Full particulars will be given later

Churches

ST. AMBROSE CHURCH

ST. MARY'S CHURCH
Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a. m.

J. E. Tarrant's Body Shipped to California Tuesday For Interment

His Brother Accompanied Remains to Last Resting Place

Rev. Father Samuel I. Tarrant brother of the late J. E. Tarrant who died here suddenly last Monday, arrived in town last Thursday night to make arrangements for the funeral and attend to the estate of deceased. Father Tarrant was undecided as to whether he would take the remains to California or ship them to Ireland for interment he finally decided to take the body with him to California.

Father Tarrant left on Tuesday's train for California with the remains. A large number of friends from Redcliff and Medicine Hat accompanied the remains to the station in Medicine Hat.

Many Citizens See "The Royal Scot" Train

Passed Through Here Tuesday Night at 11:20

Quite a number in town were at the station last Monday night to see the "Royal Scot" train pass through going east on its way back to the old country after attending the century of Progress Exhibition in Chicago. A number also motored to Medicine Hat where they had a better opportunity of inspecting the train.

Although the engine and coaches are much smaller than are in general use here, this train is the fastest passenger train in the world with a speed of 92 miles an hour. The driving wheels of the engine are 6 ft 9 inches in diameter giving a tremendous traction. It was thought by some this small engine would surely stall on some of the grades through the Rockies but she made them all on her own steam and with the throttle only half open. The only place she experienced any trouble was in some of the sharp curves.

The passenger coaches are built for comort and convenience and the trimmings and upholstering are of excellent quality and appearance. Those who saw the train—even those who had not seen over "home" for several years—were surpised at its excellence in both workmanship and appearance, and felt well paid for their hour's loss of sleep. It is estimated that over three million people inspected the train by the time it landed here on its homeward journey

Local Legion Giving Prizes for Essays

Will Be On The Subject of Armistice Day

The Department of Education is sending out a copy of an address on "Armistice Day". It is to be read in all schools on that occasion.

The local Legion is donating $5.00. to be divided into prizes for the pupils in the several grades who write the best Essay on the subject.

Masquerade Dance Was Great Success

Was Held in The I. O. O. F. Hall Last Tuesday Evening

I. O. O. F. Hall was the scene of a jolly gathering last Tuesday evening for the masquerade dance held there under the auspices of the local Rebekah lodge.

Although the costumes were not as numerous as they might have been, the judges experienced some difficulty awarding the prizes as many of them were exceptionally well made. The prizes were won as follows:

Best ladies' character costume Miss McFadzen as a colonial lady; best gent's Miss Marvel odine as colonial gentleman.

Best ladies' comic, Mrs. S. Britt as a noted person; Best gent's comic Mr. C Newnham, as a cocktail. The latter amused the audience with his interpretation of a rooster let loose in a dance hall. Len Morton also gave an amusing portrayal of a peripatetic vendor of homely necessities.

Mr. and Mrs. C. T Hall and Mr and Mrs. E. L. Stone acted as judges.

Excellent music, a capable floor manager and a jolly crowd, filled with the hallowe'en spirit, left nothing to be desired for a most enjoyable evening. This paved the way for what proved to be a delicious lunch at the close of the dance.

* * *

The regular general meeting of the local Legion will be held in the club rooms on Friday, Nov 10th. Nominations for officers for 1934 will be received at this meetin.

Redcliff Reminiscences

Taken From Our File of Nov. 6th 1914

Twenty boys appeared before magistrate Bott charged with breaking windows. They had to pay for the damage done and the cost of the court. The next time there will be a fine of $50 or 90 days imprisonment.

* * *

The Young Men's Christian League have decided to keep their rooms open for the winter months.

* * *

Mrs. S. E. Gust acted as chaperon for the Philathea Club when they entertained their friends at a Hallowe'en party on Saturday evening.

* * *

An Amateur Orchestral Society has been formed under the leadership of Doc Hall. The following are the members:Miss Amy Woodcock, piano, assisted by Miss Kennedy, F. L. O'Fallon, first violin, Doc Hall, Carnet and Rev. Hinkle, trombone.

The school teachers were the hosts at a very enjoyable hallowe'en party given in Reid's hall on Friday evening.

* * *

The author of "Tipperary" is Mr. Jack Judge a music hall artist. Almost every London publisher turned his song down. Now 10,000 copies are being printed daily, and this does not begin to supply the demand.

LOOK AT YOUR LABEL

Local Legion Will Observe Armistice

Will Parade to St. Ambrose Church For Service

Remembrance Day, Saturday, November 11th will be fittingly observed by the Local Legion. Officers and Members will meet at the club rooms at 10:30 a.m and parade to St. Ambrose Church where a short service will be held

Other organizations in town are cordially invited to join in this service

School News

All rooms in the school are closed today and tomorrow on account of the Teachers Convention in Medicine Hat. Redcliff teachers are again taking an active pert in the two day program. Miss McWaine is addressing the teachers on "Profitable Types of Seat work" and Mr. Pow is giving a paper on History in grades 7 & 8 Friday at 11 A.M. the boys physical training team which last year won the Army and Navy Veterans Trophy will give a demonstration in Riverside Park for the benefit of the teachers assembled in convention. If the weather is too inclement to permit an outdoor performance the exercises will be given in the City Hall auditorium. The sixteen smartest boys in the school selected to perform before the teachers are: Keith Ellis, Jim Towens, Robert Buchholz, Sveid Anderson, Sam Fulton. Helmer Kaldestad, Elmer Congram, Richard Rose, Reggie Rose, Eddie Schmidt, Eddie Harris, John Garrecht, Gordon Newnham, Jack Bryde, Sid Pearson and Curtis Buchholz.

St. Ambrose W. A. Hold Successful Supper

Also Have a Whist Drive in The Evening

The delicious hallowe'en supper served in the parish hall on Monday by the sr. W. A. of St. Ambrose church, was well attended and, considering the present conditions and the reduced admission fee, may be considered a financial success.

The whist drive held in the evening drew a good attendance. It was decided by a vote taken, that plain whist rather than novelty whist should be played. The winners were as follows:

Ladies' first prize, Mrs. Fairhurst; consolation, Mrs. L. Henderson; gentlemen's first, Mrs. Walton; consolation, Rev. P. M. Stewart.

JUST FOR FUN

We have a coach line that is good.
They are Janet and Jean understood.
When called to the stick,
They are willing and quick,
And their efforts are never poohpoohed

The car to watch is the car behind the one in front of you.
Holyoke Transcript.

Many a husband, knowing nothing about music, learns he can produce real harmony in the home by playing second fiddle.

Little Theatre Asso. Has Been Organized Here

Will Commence at Once To Prepare Plays

A splendid crowd attended the meeting called last Wednesday evening in the Parish Hall, to discuss possibilities for organizing a Little Theatre Group here.

Rev. P. Malcolm Stewart took the chair and called on Mr. W. King to outline the purpose and possibilities of a Little Theatre Group. Mr. King did so in a most interesting and lucid manner, after which the meeting proceeeded to the election of officers.

Mr. W. Campeau was elected president, Mr. E. L. Stone vice pres., and Miss Emma Frey Secretary Treasurer. Production Committee Mr. W. King, Rev. Mr.Stewart, Mrs. E. L. Stone and Miss McWaine. The matter of obtaining a building suitable for the production of the plays seemed to be the greatest difficulty to be faced. It was finally left in the hands of the executive to see what arrangements could be made in this regard, such arrangements to be submitted to the whole organization at their next meeting to be held the following Wednesday evening in the Parish Hall

At the meeting last evening the committee reported that arrangments were under way for the securing of a suitable building and it was expected that satisfactory arrangements could be made for same.

A motion was passed authorizing the casting committee to proceed at once with the preparation of plays for an entertainment to be put on around Xmas.

The committee reported that arrangements had been made for a system of co-operation with the Redcliff Hat group.

Membership tickets have been issued and are now on sale

Those wishing to join the local association should secure their membership tickets from members of the executive.

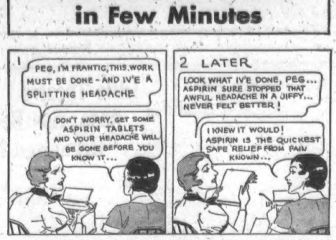
Ease Pain, Headache in Few Minutes



For Quick Relief Say ASPIRIN—*When You Buy*

Now comes *amazingly quick* relief from headaches, rheumatism, neuritis, neuralgia . . . the *fastest safe relief, it is said, yet discovered.*

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. *And thus is ready to go to work almost instantly.*

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S *quick relief*, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

A Time For Thought

Winter approaches and the year progresses steadily to its close. The major activities of this great western agricultural land are rapidly being completed for another season. The hours of daylight are becoming fewer, the days shorter, and the evenings and hours of darkness longer. As Nature thus works out its annual changes, man, too, alters the routine of his life. As his activities on the land become lighter, he rises later in the morning and retires to rest later in the evening. And he employs those evening hours in ways not possible to him when physically tired out from a long day's labor in the fields.

In the late Fall and Winter months thousands of people in Western Canada devote themselves to reading, to study, to forms of recreation, to community gatherings, which are not possible during the strenuous months of plowing, seeding, harvesting and threshing. The Fall and Winter becomes the time for self-improvement, for checking up of oneself, for planning for the future.

Possibly, because of the very nature of the times through which the world is now passing, with a multitude of, as yet, unsolved problems; because of difficulties to be overcome which are taxing the resourcefulness and testing the courage of everybody; because of the danger of feelings of despair overcoming hopefulness and faith,—because of such a world condition it is probable that people will do even more thinking and study than in times past.

Unquestionably people are thinking, perhaps as they never thought before. Admittedly, there is much loose thinking, reckless thinking, by some. There are others who, perhaps, imagine they are doing some real thinking but who, in reality, are allowing others to think for them and are merely adopting the thinking of others. But many others, probably the vast majority of people, are thinking for themselves, thinking seriously, and earnestly studying, and will continue to do so in even more earnest, serious fashion during the next few months.

Few investments, says one writer, are so sure and profitable as the effort to equip oneself in the four fundamental accomplishments:

1. How to think accurately and comprehensively.
2. How to express thought in talking and writing.
3. How to work skilfully with the hands.
4. How to take one's place among men.

The next four or five months will provide a golden opportunity for many of us to make such investments. As we read a newspaper, magazine or book, and obtain entertainment therefrom, the opportunity is likewise ours to think out for ourselves the wisdom or foolishness of the thought expressed, or ideas advanced by the writer for the time being engaging our attention. It is an opportunity to test the accuracy and comprehensiveness of our own thinking.

Or, as we listen to some speaker over the radio, to an eminent clergyman, a man well known in public life, an outstanding figure in the financial or industrial world, a great scientist, inventor, traveller, author, or social worker, and as we glean information, and hear definite opinions advanced, we, of course, advance our knowledge and are entertained. But we will have missed a real opportunity for self-advancement if, at the same time, we fail to ponder over and analyze what we hear, and bring our own thinking apparatus into full play, and apply the test of our own serious, concentrated thought, to the views expressed and the ideas advanced.

It is well to be a good listener, a consistent reader, but it is better to be a student. Let us absorb from others; in that way information is gained and knowledge advanced. But let us be something more than a sponge which merely absorbs. Let us train ourselves to sift the true from the false; the good from the evil; that which is strong from that which is weak; selecting that which is constructive from that which is purely destructive.

There is much to criticize these days, and destructive criticism is about the easiest thing in which any person can indulge. But there is also much to commend and applaud. War with all its horrors and suffering is to be condemned,—condemned as the peoples of the world have not yet seen fit to condemn it,—but even in the days of war there was nevertheless developed attributes of character of the finest and noblest type. The present economic depression is a world tragedy. Its evils must be mitigated, and a repetition of it prevented as far as it is humanly possible to prevent something over which man alone has not complete control. But out of the depression there is slowly, but surely, arising a greater conception of man's relations, duties and responsibilities toward his fellow man.

There is a better way of life for every individual, for every community and nation, for the world. It will be brought about, and the new era ushered in, not by some tremendous upheaval, not by a rapid overthrow of what now is and the equally rapid substitution of something else, not by the efforts of any one man, or party, or nation, but by the individual efforts of all combining to one great common end. The man or woman who does his or her own thinking, deep, serious thinking, and who applies their own God-given powers and energies to the particular task which confronts them, will be the real creators of, and leaders in, the new era that is dawning.

Now is the time for every person to fit himself or herself for the great work now at hand and ahead.

Summer Complaint Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months.

You cannot tell when it seizes you how it is going to end. Let it run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

London's New Lighting Scheme

Famous Buildings Will Be Floodlighted On Certain Occasions

Canadian visitors to London this winter will find town a much less gloomy place than they had been led to expect states Douglas Webster, London Correspondent of the Regina Leader-Post. A lighting scheme has been planned and will be carried out this winter which will rid London of its reputation of a city of dark and gloomy places.

Famous buildings such as the clock tower of the Houses of Parliament, the National Gallery, Westminster Abbey and St. Paul's Cathedral will be wired for floodlighting and illuminated at certain times.

The London society has the plans in hand. Its intention is to flood-light certain buildings frequently and especially on such days as have national significance. The cost will be borne privately.

The project was first mooted by the Incorporated Association of Architects and Surveyors some three years ago. Nothing came of it then. Today the London Society has the matter well in hand and it is hoped that the first display of floodlighting under the society's auspices will coincide with the British Industries fair which takes place early in 1934.

Although this floodlighting is designed to boost the Industries Fair the scheme will not stop there. The Royal Society intends to make it a permanent feature of the London season.

DEPRESSED BY ACUTE ACIDITY

There can surely be no doubt about the effectiveness of a remedy for acidity that can give such permanent relief as in this woman's case:—

"I suffered for many years from acidity in various forms," she writes. "At last it became so acute that every morning I woke with a gnawing pain and a great depression of spirits. I tried Kruschen Salts, and the effect was magical. The pain subsided and the depression lifted like a cloud. I have taken the daily dose of Kruschen ever since. That was about five years ago, and the Kruschen does not lose its effect."—(Miss) E.M.H.

Kruschen is so effective with acidity because it neutralizes acid, takes all the torment out of it, and gently expels it from the system. And by stimulating your organs of elimination to perfect regular action, Kruschen will prevent this harmful acid from ever accumulating again. After that you'll experience no more misery after meals.

Report Col. Fawcett Is Alive

British Explorer And His Son, Missing Eight Years, Said To Be Held Prisoners

Reports were received at Rio de Janeiro, that the British explorer, Colonel H. P. Fawcett, and his son, who have been missing eight years, are alive in the jungle.

A despatch from Cuyada, Matto Grosso, to the newspaper "Anoite," quoted Arao Bezerra, a planter in Parnanitiga, as saying that an Indian woman told him two white men were being held prisoners by Cuicuru Indians in the Xingu district, a 45-day journey from Paranatinga.

Similar reports have not been confirmed.

New Inheritance Law

Jews Cannot Inherit, Sell, Or Divide Farms In Germany

Germany's small farmers became a "privileged" class when Chancellor Hitler signed a revolutionary land inheritance law whereby Jews are not permitted to sell or divide lands among heirs. The law defined an "inheritable" farm as a tract including arable and forest land not exceeding 310 acres and possessed by a capable farmer. The law says: "The farm owner shall henceforth be called a peasant. A peasant must only be a German citizen of German or kindred blood and honorable."

New Members Of League

Argentina, Australia and Denmark have been elected to seats on the League of Nations Council. Argentina received 49 votes of 53 cast; Denmark received 52, and Australia, 47. The three were elected for three-year terms as non-permanent members. They succeeded, espectively, Guatemala, Norway and the Irish Free State.

Germany is estimated to now have 500,000 men and 12,000 women tramps.

Canada has been the leading exporter of flour to the Trinidad market for many years.

Salary cuts in salaries of employees of West Sussex County, England, made in 1931, have just been restored.

Foresee Maritime Towns Moored In Atlantic

Forerunner Of Many Others Likely To Rise In North Sea

A vast uncharted island, forerunner of many others which will give to the world a new race of island dwellers, is said by a Berlin correspondent likely to rise shortly in the North Sea. A time in the near future has been visualized when there will be maritime towns moored in the middle of the Atlantic and complete with luxury hotels and landing grounds for aircraft. Fast airplane services will be begun from the mainland and in between the island communities, aerodromes, with powerful wireless stations, will be built. Then will come the health seekers. Week-enders will discover this new world on their doorsteps. The islands will have their trees, flowers and gardens. The sea will be harnessed to provide electricity, and the wants of the communities will be supplied by cargo carrying aircraft from the mainland.

More Work Under N.R.A.

Expect One Million Or More Have Been Re-Employed

Possibility that the count now being plotted in the United States by the N.R.A. may show re-employment of 1,000,000 or more persons in excess of present estimates is being held out by statisticians to Hugh S. Johnson, the administrator.

They have calculated that the actual count of noses by direct solicitation will reach tens of thousands of employers who do not report regularly through ordinary channels and may show that between 4,000,000 and 5,000,000 persons have found work since the low mark of last winter. The present accepted figures, based largely upon reports to the labor department by industry and upon trade union estimates, run to approximately 2,500,000.

Good Way To Stop Acid Stomach

Any druggist will tell you the best way to stop acid stomach and indigestion is to take a little Bisurated Magnesia in water after meals. This will stop your indigestion and sweeten the stomach, get rid of gas and belching in no time. Ask any druggist.

Barter In Natural History

Barter has been winning its way into all department of life in Great Britain as well as elsewhere and now has entered the realm of natural history. A number of moths, the first of their species caught in England, have been exchanged by the museum at Hull with a natural history museum for a whale.

Reproduces Natural Colors

Dr. Charles A. Tozier, of Massachusetts Institute Of Technology, has evolved a special process of reproducing natural colors of photographed objects on lantern slides. He has a set of slides illustrating geology, zoology, botany and anthropology taken in all parts of the world.

TIRED AND IRRITABLE?

Take Lydia E. Pinkham's Vegetable Compound

It steadies the nerves and helps to build you up. You will eat better . . . sleep better . . . look better. Life will seem worth living again. Remember that 98 out of 100 women say, "It helps me." Let it help you too. Liquid or tablet form, as you prefer.

Japan's Activities In Pacific

Writer Claims Japan Intends To Put U.S. Out Of The Picture

"Japan is now definitely and methodically preparing to put the United States out of the west Pacific picture by force, as she did Russia in 1904," said Upton Close, author and lecturer, who passed through Victoria after a trip to Japan and Hawaii.

"When President Roosevelt authorized resumption of building of the United States navy, the Japanese gave up hope of bluffing and persuading the people of the U.S. to withdraw from the Pacific," he said. "Japan now means business."

The author said he was banned from Manchukuo because of his criticism of Japans activities in that state.

"The Japanese people have been propagandized to the point where they will now not permit any ruling clique to abandon the campaign for domination of China and the Pacific," he asserted. It was high time the people of North America ceased to be deluded by Japanese Government officials who declared war with the U.S. was "unthinkable."

Aurora Not Connected With Weather Changes

Opinion Of Leader Of British Polar Year Party

The aurora borealis, so far as known, has no connection with weather changes, Dr. J. M. Stagg, leader of the British polar year party, told interviewers at Winnipeg. Many people have held the belief a display of aurora meant a change in weather. If it appeared during warm weather, they held, lower temperatures would be received within a 24-hour period, and its appearance during cold weather would mean the coming of warmer days.

Dr. Stagg's study in the far north, at Fort Rae, North West Territories, failed to confirm this belief. He did find, however, the aurora disrupts land telegraph lines, and had a direct effect on short wave radio communications.

Pictures Made Of Cloth

Work Of Finnish Artist Resembles New Type Of Oil Painting

Pictures made of pieces of cloth chosen for their colors and stuck to a flat surface are on exhibit in Montreal, the work of a Finnish artist, Elsa Meri-Kailio. There are landscapes, flower pictures and even a few figure subjects, in which scraps of woven stuffs have been used to produce the effect of flesh painting. Silk, muslins and all kinds of textiles are used and a great deal of patience and skill must have been required in working them into pictures to gain some striking effects which are quite surprisingly like many of the newest types of oil painting.

A Very Old Ailment

Mastodons Suffered From Toothache Million Years Ago

Toothaches did not originate with the advent of man, it is revealed in a visit to the dental exhibits at "A Century of Progress," in Chicago.

More than a million years ago exhibits reveal the mastodons, brontoland and sabre-toothed tigers were suffering from aching molars.

"Pyorrhoea in a camel a million years ago," reads the sign above one display in the exhibit located in the Hall of Science. Beneath is the jaw bone of an early ancestor of our present-day camel.

An Unusual Concert

Glee Club In England Composed Entirely Of Grandfathers

Grandfathers formed a Glee Club and gave a concert in Lambeth, England, recently. Nine grandfathers sang, one grandfather played the accompaniments and the "call boy" was a grandfather aged 74. Younger members of the audience and grandmothers helped with choruses of such songs of 50 years ago as "Darling Mabel," "Running Up and Down Stairs" and "The Girl in the Pinafore Dress."

Gives Speed Exhibition

Who calls this a young man's world? At the Halifax County Fair, held at Middle Musquodoboit ,N.S., George Landells, a man of more than 80 years, gave an exhibition of speed, driving his own fast horse, to the delight of the spectators.

Cigarettes produced in Egypt in the last year are estimated at nearly 5,000,000,000.

Farmers of the island of Jersey are joyful over prospects of the biggest potato crop in 18 years.

Some folks don't even like to get up to see the dawn of a new era.

Put Where the Test Begins

Yes, sir, there in the pipe bowl is where tobacco does its stuff. And right there is where Ogden's Cut Plug shows itself to be downright good pipe tobacco. For Ogden's packs right, lights right and burns right ...Cool, sweet and fragrant from beginning to end.

See if you don't agree that Ogden's is the tobacco for your pipe. Load the bowl and let the test begin.

OGDEN'S CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chantecler cigarette papers

Again Seeking Franchise

Another Attempt Being Made By Women In Quebec

Arrangements whereby a measure, seeking the provincial franchise for women in the Province of Quebec will again be completed in the legislature will be completed shortly, it was announced at the opening meeting of the League for Women's Rights in Montreal.

The league will also petition the provincial government to enact legislation requiring all vehicles to carry lights at night, in view of the many cases of loss of life resulting from collisions between automobiles and unlighted wagons.

"So you are the sole survivor of a shipwreck! Tell me how you came to be saved."

"Well, you see, I missed the boat."

London is to have its first camping, hiking and allied sports exhibition in April.

Sweet scented gladiolus blossoms are a new triumph for flower growers.

• STOMACH COMPLAINT •

Mrs. W. Banton of 445 Simcoe St., London, Ont., says: "Some years ago I used Dr. Pierce's Golden Medical Discovery when I was run-down and awfully nervous. It helped me wonderfully and in a few weeks would press up around my heart. The 'Discovery' strengthened my system so that I felt 100% better."

Write to Dr. Pierce's Clinic, Buffalo, N.Y., for free medical advice.

Water Diversion Project

Plan To Divert North Saskatchewan River To Solve Drouth Problem

As a means of solving the drouth problem of southeastern Alberta and relieving unemployment, a large-scale water-diversion project may be submitted to Prime Minister R. B. Bennett.

A diversion of the North Saskatchewan River, west of Red Deer, and a crossing of the Red Deer River at Content are the main features of the scheme. Sullivan Lake would be filled as the first of a chain of reservoirs, and the watering system would feed the Hanna area and the Acadia Valley, thence into southern Saskatchewan.

Under present conditions, it is claimed, the cost would total about $20,000,000.

The Circulation War

Big London Dailies Find Premium Idea Too Costly

Lord Beaverbrook has seemingly taken the first step toward hauling the big London newspapers out of the madhouse in which they have been living for half a year. The "war" for circulation among four of the leading dailies, with the magic number of 2,000,000 readers as the goal has been signalized by tremendous barrages of free gifts, insurance schemes, crossword puzzles with $5,000 for first prize, hundreds of thousands of sets of Charles Dickens at a nominal price, and the like. Lord Beaverbrook now says that four months of this has cost the Daily Express more than a million dollars, and he is convinced that such circulation is worthless and the whole procedure is ruinous.

Of course there is one considerable economy which the London newspapers could have made. Their readers must have been so busy with their crossword puzzles, insurance coupons, guessing contests and works of Charles Dickens that they simply couldn't have had time to read the daily papers. Editors and reporters could thus have been dispensed with. —New York Times.

Bentonite Clay

Valuable Deposits In Saskatchewan Establishes New Industry

Possibility of the development of Saskatchewan's bentonite deposits in the Eastend district is seen by W. H. Hastings, industrial development engineer of the Department of Railways, Labor and Industries.

Bentonite is a very fine grade of clay produced through the weathering and decomposition of volcanic ash deposits and is used for filler material for decolorizing oil in refining processes, for filler materials for the manufacture of paper and plaster, as a base for the manufacture of soaps, and as the base of beauty clays.

Already a certain amount of development has been undertaken by the International Clay Products of Estevan. The bentonite was shipped to the company's plant at Estevan for the drying process as an experiment. In order to make the production profitable, said Mr. Hastings, it would be necessary to put in a plant right at the deposits.—Regina Leader-Post.

Meets Kindred Again

Cattle For Shipment Excite Only Cow In Northern Settlement

The only cow in the north country, taken to Gillam, Man., in 1927, has experienced the thrill of a lifetime. Provider of milk for this little Hudson Bay Railway settlement, Gertie, much excited, dashed wildly to the tracks when the first stock train over the northland railway arrived en route to Churchill. She paraded both sides of the 10-car train, exchanging bawls with the cattle destined for the markets of the United Kingdom. As the train headed northward, she stood on the tracks and bawled a lusty farewell.

Worked For His Ride

An Ontario youth who hitch-hiked his way to a nearby city recently, states he is going to use a little more discrimination about whom he rides with in future. In going about seven miles with three middle-aged women he had to change two tires and walk half a mile for gas when it was found the tank was empty.

Instructor: "This, madam, is the handbrake—it's put on very quickly, in case of an emergency."

Madam: "I see—something like a kimono."

Hornbills, birds with huge beaks which are nearly hollow and weigh practically nothing, have been found in Africa.

W. N. U. 2016

AS THE BULLETS FLEW IN THE BLOODY HAVANA BATTLE

These pictures from turbulent Cuba take you into the battle line in the vicinity of the National Hotel in Havana, where a body of army officers hostile to the new regime were besieged by troops loyal to President Grau San Martin. The top picture shows a view of the hotel, from the besiegers' vantage point, during the battle; lower right, riflemen and machine gunners firing on the National from a hallway; lower left, another point of the firing line. Note the Cuban youths braving death to witness the battle. Over 100 were killed and as many more suffered injuries from the flying bullets.

One Of Oldest Vegetables

Carrots Were Used By Greeks Before Christian Era

Long before the Christian era the merits of the carrot as a medicinal plant were recognized. As the inhabitants of the old world gave up nomad life and settled down to rear plants, the carrot was one of the first to come under cultivation. Theophrastus, the Greek philosopher, in 320 B.C., mentions a plant which he calls Stafylinea, but it is not certain whether he meant carrot, parsnip, or some other related plant. Whether the purple carrot was known at all earlier it is impossible to say, but, Theophrastus is the first author, of whom there is record, to use the name Stafylines.

According to the Dominion Forage Crop Division, the first author who distinguished carrots from parsnips was the Greek medical writer and surgeon, Dioscorides, who on his many travels during the continuous wars of his time, had the opportunity of seeing and describing a large number of medicinal plants. He uses the name Stafylines for the carrot and Elafoboskon for the parsnip. In the original Greek, the word Stafylnes means resembling the grape, and so remarkable is the description given by Dioscorides that there can be no doubt the violet or purple carrot is being referred to.

While the white-fleshed carrot seems to be the only type apart from the purple that was known in the early ages, the yellow carrot seems to have been the most common from the end of the Middle Ages to the beginning of the eighteenth century.

The violet or purple carrot, which maintained its existence from the earlier ages, throughout the Middle Ages and up to the beginning of the 19th century, has entirely disappeared after more than 2,000 years of cultivation of which we are cognizant. The present day cultivated types of carrots all appear to have descended from a variety which can be found growing wild in most districts of Europe and the Western parts of Asia.—St. Thomas Times-Journal.

Prices Lower

Slight Drop Shown In Wholesale Prices For September

A fractional decrease was shown in the index number of wholesale prices on the base of 1926 equals 100, for September, when the figure was 68.9 as against 69.4 in August, according to a report issued by the Dominion Bureau of Statistics. There were 84 quotations higher, 102 lower, and 316 remain unchanged.

Vegetable products declined from 65.7 to 62.5, animal products rose from 69.8 to 60.7; fibre, textiles and textile products advanced from 71.1 to 71.7.

Wood, wood products and paper moved up from 63.4.

Consolidation Of Customs Act

A consolidation of the Customs Act, together with all amendments to the tariff, has been completed by officials of the national revenue department in a comprehensive volume just issued. The book contains all the Canadian trade treaties and interpretive notes for the guidance of importers. A number of explanatory appendices also add to the elucidation of that complex element of fiscal administration —the tariff.

New Use For Thermometer

May Aid Fishermen At Newfoundland To Locate Codfish

Science may soon come to the aid of the fishermen in yet another way. The North American Council of Fisheries Investigation was told at its annual meeting in St. John, N.B., of a method, as yet undeveloped, for locating cod on Newfoundland's grand banks.

The method, as outlined by Dr. Harold Thompson of the Newfoundland Fisheries Research Commission, is simple. It hinges upon the cod's sensitivity to variations in water temperature.

Under Dr. Thompsons plan, a key ship equipped with temperature recording instruments would patrol the banks, sending out periodic information as to conditions in different areas. Fishermen, knowing where the water was warm and where cold, would be able to proceed directly to the places where fish were most abundant.

To Protect Sacred Mountain

Japanese Priests Opposing Project For National Park In District

Priests of the Omineyama Temple in Japan are strongly opposing a government project for a national park in the Yoshino mountain district in which the sacred mountain of Sanjogadake stands. For more than a thousand years no woman has been allowed to climb it and if it is included in a state park that will mean the advent of women who will walk upon the mountain. More than 500,000 devotees, who would consider it a sacrilege for a woman to tread the mountain, are against the project.

Helping Him Out

"I know what's passing in your mind," said the maiden. "I know, too, why you are calling here night after night, appropriating my time to yourself and keeping other nice young men away. You want me to marry you, don't you?"

"I—I do!" gasped the astonished young man.

"I thought so. Very well, I will."

Sponges Search For Food

Specimens Of Walking Variety Found In London Aquarium

Sponges that can walk about in search of food, instead of being forever anchored to one place have mysteriously appeared in tanks of sea water in the London Aquarium. Mr. Maurice Burton, the sponge expert of the British Museum, says that he has been unable to find any sponge of this kind among those previously captured by scientists. The habit of the sponge animals is to fasten themselves permanently to some spot on the ocean bottom and never leave it until they die, food being obtained by a continual current of sea-water in and out of tube-like passages which penetrate the sponge's body. Living specimens of the walking sponges, however, were collected and submitted to Mr. Burton, who verified the reports of the museum keepers that the sponges do creep slowly from a foodless spot to one where the supplies of provender are greater.

Kind Words For Prince

Heir To British Throne Is Eulogized By French Newspaper

The New Parisian daily newspaper, "Le Jour," appeared recently with an eulogistic editorial on the Prince of Wales. "The Prince, with the physical resistance of an athlete, endowed with extremely keen intellectual faculties, possessing unshakable moral stability, is the master of himself, as he will one day be the master of half the globe," it said.

"What one likes about him is that besides being the heir to a vast Empire, he is a man strong and independent, sure of himself and silently watching his destiny approaching him."

Client: "You say the lady is worth £50,000. Can I see before I decide?"

Matrimonial Agent: "Here is her portrait."

Client: "No. I meant the £50,000."

Sales of luxuries have boomed recently in Bolivia while, at the same time, demand for necessities dropped perceptibly.

FANCIFUL FABLES

Problem Should Be Seriously Considered

Beatty Sees No Harm In Properly Controlled Immigration

Canada has nothing to fear from the "steady immigration of a relatively small number of people per annum under conditions of land settlement which will be carefully worked out for their benefit and for the country's protection," said E. W. Beatty, president of the Canadian Pacific Railway, commenting on his recent trip through western Canada.

Plans now under study foresee "moderate, controlled and financially supported" immigration, continued Mr. Beatty. The problem of immigration unfortunately was "confused in the minds of many with unemployment and crop failures."

The great importance of the problem was not being overlooked, however, "by those who realize that there is no real connection between unemployment and the establishment on the land of those who will from the beginning be self-sustaining and therefore not a charge to the community."

"I think I would be one of the last in Canada to recommend anything which would accentuate our present unemployment situation," continued Mr. Beatty, "but I am satisfied that the kind of immigration now being discussed, involving settlement upon lands of men who will be adequately supported and would become self-supporting, is a problem which demands serious consideration.

"It must not be forgotten that no intensive flow of immigrants is expected or desired, that even the most moderate of policies will require a year or more to become effective and that any plans made in 1934 will not be operative until at least a year later."

Just Chance For Choice

People Can Put Leisure Time To Any Use

There is a very old saying that it is not sorrow nor trial that puts the severest test to human character, but prosperity and personal success.

There is much truth in the saying, and much also in the further one that the surest test of a people is in the use to which it puts its leisure.

Man works because he must. He makes the most of it and finds no reason for complaint, but rather for pride that he can do it well and in content.

But of his leisure he makes what he will. Here he is finds full evidence in the fashion in which he spends the time that is his to choose what he will do.

The matter happens to have become very vital one right now. The American people are to be tested in the matter of their understanding of the blessedness of leisure.

Here now at last is a chance to follow Jefferson's instinct for voluntary labors of fascinating and inconsequential sorts, to have time for study, for reading, for unhurried works of human helpfulness, for digging in one's garden, for exploring the neighboring countryside, for knowing one's neighbors.

The word leisure itself, merely means the chance for choice.

To use it not only with wisdom, but with prodigal and joyful abandon is to find a new spirit in life, a new happiness in living, and a new heart for work when the working time comes round.

The Best Of Reasons

His wife returned from the morning shopping expedition and called her husband into the room from the garden.

"Frederick," she said heavily, "when you came home last night you told me you had been to the Grand Hotel with Mr. Wilson. I've just met Mrs. Wilson, and she said you were both at the Trocadero. Why did you lie to me?"

Hubby groaned.

"When I came home last night I couldn't say 'Trocadero'."

Long Trip For Launching

A ship which was launched more than 3,000 miles from the shipyard where it was built is the yacht "Vamarie." The vessel arrived at Boston on the Hamburg-American freighter "Leuna" from Lemwerder, Germany, and was lowered overside in Boston harbor by a navy crane. She was consigned to a firm of New York yacht brokers. Duties amounted to $7,707, and ocean freight charges were $2,500 more.

Motor Fuel From Potatoes

All industrial alcohol, to be used as fuel for motor cars in Ireland, as well as in dyes, heating and lighting, has been developed from potatoes and will be more a government monopoly, it was revealed at Dublin. The estimated production cost is sixpence a gallon.

An Unpleasant Experience

Halifax Teacher And His Companion Lose Way In Ghostly Cavern

Lost in a treacherous, damp cave, filled with carbon monoxide fumes, un-nerved by constant rumblings of tons of crashing rock, and battered by the slashing wings of bats disturbed in their dark solitude, is part of a story told at Halifax, N.S., by A. E. Ettinger, school teacher, who makes exploration of unknown places on his summer holiday pastimes. And, the story is vouched for by a red-thatched newspaperman, Mike Ryan, who also admits the experience wasn't his idea of a pleasant holiday.

Ettinger, secretary of the Halifax Men Teachers' Federation, returning from exploring 32 caverns of the big recess that he describes as a "great natural phenomenon which has baffled all attempts of science to explain," said the "junior rival to the famous Mammoth cave of Kentucky" is in a plaster mountain on Richard Haye's farm at Maple Grove, near Maitland, Hant's County, Nova Scotia. Legend points to the place as one of Captain Kidd's treasure caches.

Few humans ever have travelled to the innermost recesses of this cave where, Ettinger says, death awaits the unwary at each footstep. The dangers, he adds, are from carbon monoxide gas and constantly falling plaster rocks. The cave, in which only "thousands of bats" can survive any length of time, ranged from at least 150 to 300 feet deep and extended more than a half-mile.

It was down in one of these chambers Ettinger and his companion found themselves up against a black wall, feeling dizzy and nauseated from poisonous fumes, their searchlights playing on countless thousands of bats swooping madly about—and lost. The teacher, in desperation, crawled on his stomach along a dripping, narrow tunnel but he was unable to get his shoulders through the little aperture leading to the succeeding den.

Slight whiffs of fresh air that saved them from being overcome led the explorers, in their narrow confines for more than three hours, to believe another passage, as yet undiscovered, existed on the other side.

Describing his feelings when he and his companion discovered they were lost in what he aptly described as a reproduction of Dante's Inferno, the teacher said:

"It was a terrifying experience. The horrible fate of Floyd Collins in the Mammoth Cave of Kentucky flashed through my mind. I once dismissed such depressing recollections and tried to recall the theory of one school of philosophy that matter does not exist except in one's own mind, but with boulders and bats for companions there was small comfort in this.

"Spurred on by the knowledge indicated by a growing drowsiness and a severe headache that the foul atmosphere inside the caverns was taking its toll, we began a methodical effort to locate blue markings we had carefully placed at strategic points on the white plaster walls for such an emergency.

"After a search of perhaps a half hour our feelings which had bordered on despair were changed to joyful thankfulness when one of our flash lamps, the batteries of which were fast running down, I picked up one of the arrows which I had drawn with our bearings once more decided it was perhaps only a few minutes before we reached the cave mouth although it seemed an endless journey. Although I was thrilled and amazed with what I saw within, I have no anxiety to repeat any similar exploration trip within its confines."

Amazing Flower Display

Annual Show In England Cost $50,000 To Present

Amazing display of flowers was on exhibit at Southport, England. Among the more striking exhibits were thousands of roses and carnations, dahlias a foot wide, orchids that once belonged to Joseph Chamberlain, seventy-year-old cactus plants and a new fruit, raspberry crossed with a strawberry, achieved by a local botanist. The show is now ten years old. It costs £50,000 to present and another $25,000 is offered in prizes.

An Escape-Proof Cell

An "escape-proof" cell, especially designed for criminals of the Harvey Bailey type, was recently constructed within the Denver county jail. The cell is built of concrete with a double set of bars over the window and door. A steel cage is then set inside the cell, with a runway coupled by around the cage inside the cell. A heavy steel door was fixed in the entrance to the cage and another in the entrance to the cell.

Heavy Ice Cream Bill

Saskatchewan Consumed About $400,000 Worth Of Confection In 1932

Saskatchewan palates have a yen for ice cream.

During the year 1932 residents of the, province consumed more than 300,000 gallons of this confection at a cost of almost $400,000.

The total value of all dairy products in the province in 1932 is estimated at $13,033,100, and residents consumed 35,000,000 gallons of milk with a value of $5,250,000.

This information was released by the Department of Agriculture.

Statistics show that for the year, the amount of milk fed to calves was estimated at 7,530,000 gallons.

During the same period, 17,880,885 pounds of creamery butter and 21,500,000 pounds of dairy butter, were produced. Fifty-six creameries were in operation.

New Firm Incorporated

Treasure Seeking Company Officially Listed In Canada Gazette

Incorporation of a company to seek for hidden treasure is given official notice in the Canada Gazette. The Canadian Oak Island Treasury Company, Ltd., with capital stock of $150,000 and head office at Victoria, B.C., has been incorporated.

Its purpose was defined in the official notice, as follows:

"To locate, seek for and extricate from or under or in the vicinity of Oak Island in the province of Nova Scotia, in the Dominion of Canada, buried or hidden treasure, money (gold, silver, copper), minerals, metals, coins, precious stones, jewels, trinkets, bullion, ornaments, or any other useful or valuable objects.

Fire Prevention In Saskatchewan

Hon. James F. Bryant Gives Some Information About Fire Prevention In Saskatchewan

As minister in charge of the Fire Prevention Act and the Prairie and Forest Fires Act of the Province of Saskatchewan, I take the opportunity afforded by the Fire Prevention Week to bring to the attention of the people of Saskatchewan the necessity of greater caution and care on the part of the majority of the people of Saskatchewan in order to prevent loss of life and property by fire.

Reliable statistics show that over a period of ten years, 407,000 fires in Canada have destroyed property valued at over $402,890,192 or an average of over $40,000,000 per year, and that during the same period 3,514 lives were lost in burning buildings or over 351 lives per year, and in addition 9,067 persons were seriously injured by fire. These figures do not take into consideration our losses in property and lives caused by forest fires.

In the year 1932, there were reported in Canada, 47,853 fires with a property loss of $42,193,815.00. That, however, was not the total loss by fire. To it must be added the incidental cost of insurance protection, and the cost of maintaining municipal fire departments and water supplies for fire extinguishing. Including these items, Canada last year incurred an unproductive expenditure of over $100,000,000 through fire, or roughly $200 for every minute of the year. Capitalized at five per cent, this represents the gigantic sum of over $2,000,000,000 which is only a little less than our National Debt. If directed to programmes of constructive effort instead of being wastefully dissipated, such a sum would go far towards the amelioration of many of the social and economic ills from which we are suffering at the present time.

Reliable statistics show that over 80 per cent. of the fires which occur originate either directly or indirectly through inexcusable ignorance and neglect, and are therefore preventable and that the exercise of reasonable prudence and care would reduce the losses by fire in Canada to the comparatively insignificant losses in other countries.

While we spend millions yearly to equip and maintain fire fighting departments for the purpose of putting out fires after they start, and our fire departments in personnel and apparatus are admittedly superior to those of Europe, only a few thousands are spent to prevent fires from starting. It would seem as if we were attacking the problem from the wrong end to a great extent. The best time to deal with a fire danger is before the fire starts, that is, by the adoption of such preventive measures as will make it almost impossible for a fire of any consequence to develop. That is how the problem has been successfully solved in Europe and as a result very low insurance rates prevail in European countries.

It must be borne in mind, that fire insurance rates for a country or community are based on fire losses previously incurred in that country or community. The fire losses govern the amount the insurance company must collect from the public in fire insurance premiums, and the higher the losses from fire, the higher the insurance premiums paid by the public.

It is gratifying to note the manner in which has attended the Fire Prevention Campaign of the Government in the last four years. In 1929 Saskatchewan lost by fires, exclusive of forest and prairie fires, the sum of $4,859,670. In 1932, the Saskatchewan fire loss amounted to $1,673,741 or about 34 per cent. of the fire loss of in 1929. In 1929 there were only three provinces in Canada where the fire losses were greater per capita than in Saskatchewan. In 1929 Saskatchewan fire losses amounted to $5.60 for every man, woman and child in the Province. By 1932, the Saskatchewan fire losses were reduced to $1.82 per capita, as compared with $1.60 per capita in 1929, and Saskatchewan occupies the proud position of having the lowest per capita fire loss of any province in Canada. We believe that our Fire Prevention Schools, Fire Prevention Campaign through the schools and homes of the province, in which preventive work Saskatchewan led all the provinces of Canada, has contributed very materially to this marked reduction.

The results of our Fire Prevention Campaign and the tightening up of our fire inspection work has also been a great deal of gratification and satisfaction to those engaged in fire prevention and to the Fire Insurance Underwriters. I desire, as minister in charge of the Fire Prevention Act, to thank all who have taken part in this campaign which has produced such splendid results. I thank also the Fire Commissioner and the officials of my department engaged in this work, the Fire Chiefs, the School Trustees, the teachers and the pupils of the schools and also the parents who so heartily co-operated with the children in their study of fire hazards and how to prevent them.

In addition to the fire losses already referred to we have suffered loss through forest fires and here again there has been a marked improvement in Saskatchewan during the last four years. In the year 1931 the control of forest fires was under the Dominion Government. Provincial control started in 1931. The number of fires in the forests during the last four years are as follows:—1930, 355; 1931, 191; 1932, 121; 1933, 94 to date.

The total forest area burned over is as follows:—1930, 396,000 acres; 1931, 181,907 acres; 1932, 51,363 acres; 1933, 26,000 acres, as compared with 390,000 acres in 1930. The total loss in the forests was as follows:—1930, $455,068.00; 1931, $117,189.00 1932, $75,810.00; 1933, the amount or loss is not complete to date but is very much less than in 1932.

The cost of forest fire suppression is as follows:—1930, $62,464.00; 1931, $16,445.00; 1932, $5,902.00; 1933 estimated cost $1,600, as compared with $62,464.00 in 1930 under Federal control.

We attribute this reduction in the fire loss partly to the wet weather and to a great extent to the tightening up of the fire regulations and the amendments which we have made, providing for stricter control of fire in the north country.

A great many of our fires during the early part of the season are due to settlers starting fires for the purpose of clearing up their land. With the burning permit system in force, the field officials of the Government have been able to control to a considerable extent the losses occasioned from this cause. Settlers are requested to make every effort to see that in burning their slashings the fires do not escape to adjoining lands, and the assistance of the field officers of the Department of Natural Resources will be called upon when required for instruction as to the proper handling of fires.

The radio system operated by the Government in Northern Saskatchewan in connection with its forest protection force has proven most satisfactory in providing communication between remote settlements and lookout towers, and the occurrence of fires is noted very quickly, same being reported by radio to the local officer with the Department, who may be assisted by additional fire fighters who are transported by 'plane with equipment and supplies when required.

The great hazard in the matter of forest fires is the settlers who have taken up land adjacent to and in many cases right alongside forest reserve and licensed timber berths. In an effort to clear the land for cultivation they too often carelessly resort to burning of the young growth, and the dead and down timbers in the season of the year when the timber is dry. To guard against this the forest fire regulations have been revised and amended so as to require a settler to obtain a permit from the Forest Ranger or Fire Guardians. This regulation will be vigorously enforced and all settlers and others within sound of my voice are urged to comply with the regulations and warned that failure to do so will be followed by prosecution. The Royal Canadian Mounted Police have been appointed fire guardians in addition to the regular fire rangers.

As minister in charge of fire prevention, I urge upon the citizens of Saskatchewan that at such time as may be found most practicable:

1. All dwellings and their surroundings shall be carefully inspected by their occupants and all conditions likely to cause or promote the spread of fires removed.

2. All public buildings, stores, warehouses and factories be inspected and cleaned of rubbish in order to reduce fire hazards and maintain health and safety.

3. All hotels, theatres, asylums, hospitals and institutional buildings be inspected and provision made for all changes necessary to protect the occupants from danger in the event of fire.

4. Fire drills be held for the children in the schools, for the inmates of all institutions and for the employees in all large stores and factories in order that a greater degree of safety may be ensured by acquainting the occupants with the best and most expeditious mode of exit in time of danger.

5. Special instruction on the subject of fire prevention be given by the teachers and by municipal officials, and that such other and appropriate literature as may be made available be distributed to the pupils.

6. That the leaders give instructions to the troops under their control as to the best means of co-operating with the fire departments in the prevention and extinguishment of fires and especially as to the desirability of reporting the Fireman's badge.

Practically 90 per cent. of the fires are avoidable because they are caused by carelessness. In 1932 the fire losses in Great Britain amounted to just over one dollar per capita, as compared with a $4.06 per capita fire loss in Canada. Every Canadian must make an effort to cut down these losses, and to think and work in terms of fire prevention, not this week only but fifty-two weeks in every year.

Take No Chances

When a fire occurs in Chile or Cuba the owner of the property is promptly arrested and put in prison—sometimes for weeks—until proof that he is guilty of incendiarism is shown to be lacking.

A branch railway from Romani, near Palestine, to Port Fuad, near Port Said, Egypt, is proposed as an outlet for Palestine trade.

Calling Chicago the Athens of America doesn't sound funny until you call Athens the Chicago of Greece.

"THESE HARD TIMES"

"The hard times and scarcity of money makes it more important than ever to economize. One way I save on clothes is by renewing the color of faded or out-of-style dresses, coats, stockings, and underwear. For dyeing, or tinting, I always use Diamond Dyes. They are the most economical ones by far because they never fail to produce results that make you proud. Why, things look better than new when tinted with Diamond Dyes. They never spot, streak, or run. They go on smoothly and evenly, when in the hands of even a ten year old child. Another thing, Diamond Dyes never take the life out of cloth or leave it limp as some dyes do. They deserve to be called 'the world's finest dyes'!"

S.B.G., Quebec.

We attribute this reduction in the fire loss partly to the wet weather and to a great extent to the tightening up of the fire regulations and the amendments which we have made, providing for stricter control of fire in the north country.

A great many of our fires during the early part of the season are due to settlers starting fires for the purpose of clearing up their land. With the burning permit system in force, the field officials of the Government have been able to control to a considerable extent the losses occasioned from this cause. Settlers are requested to make every effort to see that in burning their slashings the fires do not escape to adjoining lands, and the assistance of the field officers of the Department of Natural Resources will be called upon when required for instruction as to the proper handling of fires.

The radio system operated by the Government in Northern Saskatchewan in connection with its forest protection force has proven most satisfactory in providing communication between remote settlements and lookout towers, and the occurrence of fires is noted very quickly, same being reported by radio to the local officer with the Department, who may be assisted by additional fire fighters who are transported by 'plane with equipment and supplies when required.

The great hazard in the matter of forest fires is the settlers who have taken up land adjacent to and in many cases right alongside forest reserve and licensed timber berths. In an effort to clear the land for cultivation they too often carelessly resort to burning of the young growth, and the dead and down timbers in the season of the year when the timber is dry. To guard against this the forest fire regulations have been revised and amended so as to require a settler to obtain a permit from the Forest Ranger or Fire Guardians. This regulation will be vigorously enforced and all settlers and others within sound of my voice are urged to comply with the regulations and warned that failure to do so will be followed by prosecution. The Royal Canadian Mounted Police have been appointed fire guardians in addition to the regular fire rangers.

As minister in charge of fire prevention, I urge upon the citizens of Saskatchewan that at such time as may be found most practicable:

1. All dwellings and their surroundings shall be carefully inspected by their occupants and all conditions likely to cause or promote the spread of fires removed.

2. All public buildings, stores, warehouses and factories be inspected and cleaned of rubbish in order to reduce fire hazards and maintain health and safety.

3. All hotels, theatres, asylums, hospitals and institutional buildings be inspected and provision made for all changes necessary to protect the occupants from danger in the event of fire.

4. Fire drills be held for the children in the schools, for the inmates of all institutions and for the employees in all large stores and factories in order that a greater degree of safety may be ensured by acquainting the occupants with the best and most expeditious mode of exit in time of danger.

5. Special instruction on the subject of fire prevention be given by the teachers and by municipal officials, and that such other and appropriate literature as may be made available be distributed to the pupils.

6. That the leaders give instructions to the troops under their control as to the best means of co-operating with the fire departments in the prevention and extinguishment of fires and especially as to the desirability of reporting the Fireman's badge.

Practically 90 per cent. of the fires are avoidable because they are caused by carelessness. In 1932 the fire losses in Great Britain amounted to just over one dollar per capita, as compared with a $4.06 per capita fire loss in Canada. Every Canadian must make an effort to cut down these losses, and to think and work in terms of fire prevention, not this week only but fifty-two weeks in every year.

Women In Public Life

Canada Has Definite Place For Them States Senator Cairine Wilson

Women, as well as men, have a definite and significant position in Canada's public life, according to Senator Cairine Wilson.

The Dominion's first feminine member of the Upper House accepts the status of woman as primarily that of housekeeper. But, "politics are national housekeeping," she told a women's service club luncheon at St. Johns, N.B.

Senator Wilson spoke of the early struggles of pioneer women who gained for their descendants the freedom they enjoy today, especially the power to make their voice heard in public life through exercise of the franchise. "Recalling their struggles," she said, "we should make the best possible use of the privilege we have in the franchise."

The woman senator quoted President Roosevelt of the United States as saying that women would step forward into public life in increasing numbers if they realized how urgently their help was needed. She expressed surprise on learning women were ineligible for seats in the New Brunswick legislature.

National Movement

Says China Is Now Undergoing An Intellectual Transformation

China now is undergoing an intellectual transformation akin to that which took place centuries ago in Europe when Latin was supplanted by the various native languages, according to Dr. Hushin, brilliant Chinese scholar.

Dr. Hu, Chinese delegate to the Pacific Relations Institute at Banff, addressed the Canadian club at Vancouver, B.C., that until recent years the written language and literature of China was in classical form as far removed from everyday speech as was Latin from the native European tongues.

A national movement began which finally forced the government in 1921 to adopt a "living" written language in the schools, he said.

Recipes For This Week

(By Betty Barclay)

HONEY BRAN PUDDING

¾ cup butter.
⅔ cup honey.
1 egg (well beaten).
½ cup milk.
1 cup seedless raisins.
½ cup bran.
1 cup flour.
½ teaspoon soda.
½ teaspoon salt.

Cream butter and honey together. Add egg, milk and bran. Sift dry ingredients and stir in with the raisins. Add to first mixture. Combine thoroughly and put into greased mold; cover tightly and steam for two hours. Serve with hard sauce.

Yield: 6 large servings.

COCONUT BANANA SNOW

3 bananas, cut in small pieces.
½ cup powdered sugar.
2 teaspoons lemon juice.
1 egg white, stiffly beaten.
½ cup cream, whipped.
½ can moist sweetened cocoanut.

Combine bananas, sugar, and lemon juice. Chill. Force through sieve. Fold pulp into egg white; then fold in cream and coconut. Serves 6.

An Enterprising Inventor

Receives Patent For Weird Device To Clear Road Of Traffic Victims

Weird and wonderful are some of the inventions for which patents have been granted at the patents office in London.

"For instance," an official said to a reporter, "we have just granted a patent for a gigantic machine designed to clear the road of dead pedestrians who have been knocked down by traffic.

"The machine is equipped with a grab' which lifts the body and deposits it in an electric incinerator, fitted with a special chemical destructor, to turn the body into a fertilizing agent."

Another man has patented a device to harness lightning and direct it in small flashes against an enemy.

Entirely New Hobby

Member Of British Parliament Climbs Chimneys And Steeples

E. L. Mallalieu, Liberal members of the British Parliament, spent 37 minutes climbing a 500 foot aerial mast so that he could survey his Yorkshire constituency from a new angle and take photographs. He has made a hobby of climbing chimney stacks and steeples. Still in his twenties he is secretary to the president of the Board of Education.

Sure Signs

of kidney troubles are pain in the back, difficult urination, deposits in urine. Gin Pills relieve kidney trouble by gently soothing and healing the inflamed tissues. 50c a box at all druggists.

A Very Common Error

Canada Not So Backward In Aviation As Visitors Think

When Amy Mollison said the other day that aviation in Canada was apparently not making very rapid strides, she had undoubtedly fallen into the error that has been made by other visitors.

So far as passenger service in the more settled parts of the country are concerned the criticism was justified, for in that department Canada is behind many other countries.

But that does not mean that the Dominion is not making good use of aircraft, for it ignores altogether the rapid development in commercial aviation in the pioneer districts where this form of transportation is playing a magnificent part in the opening up of new mining areas, in survey work, forest fire fighting and similar activities.

Canadian Airways Limited has recently issued a circular which shows the growth of commercial flying on Canada's frontiers.

The company states that in the first eight months of this year it has broken all records in the transportation by air of mining equipment and general supplies in the northern territories.

In "bush work," Canadian Airways alone carried 1,474,704 pounds of freight during the eight month period, exclusive of mail carried on the following routes: Charlottetown-Magdalen Islands; Moncton-Charlottetown, Quebec-Seven Islands-Anticosti, Sioux Lookout-Narrow Lake, Lac du Bonnet-Central Manitoba, Mackenzie River-Winnipeg-Pembina, Peace River-Vermilion, and Vancouver-Victoria.

When it is remembered that these figures do not take into consideration any other commercial aviation concerns throughout the country, it must be admitted that Canada is not so backward as regards aviation as appears on the surface.—Peterboro Examiner.

Believes Plan Possible

J. G. Robertson Thinks Hogs Could Be Fed At Churchill

Possibility for the successful feeding of feeder hogs at Churchill, utilizing the screenings from the elevator, and the swill from the cook houses, is seen by J. G. Robertson, Saskatchewan livestock commissioner.

Recently Mr. Robertson returned from Churchill where he was interested in the loading of the first sh'pment of livestock by the Hudson Bay route.

He found the stockyards at that point very satisfactory, and large enough to accommodate up to 500 head of cattle.

He speaks well of the speed with which the loading operations were conducted at Churchill.

There are no cattle of any description at Churchill, no sheep, no hogs and no poultry. There are six horses, two motor trucks and two caterpillar motor trucks, but no motor cars.

Because of this lack of livestock, and owing to the abundance of screenings, Mr. Robertson sees an opportunity for shipping in feeder hogs with a view to supplying the resident's of the town with fresh pork. The present population of the town is about 400.

Three National Anthems

The Austrian political tangle has given the people three national anthems. The Monarchists sing, "God Preserve Franz the Kaiser," the Republicans sing "Austria, My Austria," and the Nazis are now singing "Deutschland uber Alles." All are sung to the tune of "Glorious things of Thee are spoken," by Haydn.

Japan is increasing its exports to China.

A lawsuit is apt to wear out a: the pockets first.

OCCASIONAL WIFE

By
EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful commercial artist, and Peter Anson, a struggling sculptor, meet in an art class and fall in love. She is the adopted daughter of a wealthy family, but is not to share in their fortune when she comes of age. They are faced with the problem of "marriage or career" and Camilla does not want to tie Peter down when he has so much promise as a sculptor. At an art school dance, Gus Matson, Peter's roommate, who is jealous of Peters success, takes Camilla out on the lawn to tell her "something she should know about Peter."

(Now Go On With The Story)

CHAPTER XIII.

"Well," began Gus, exhaling the smoke of his cigarette, noisily, and turning toward Camilla. "You sure do get to know a guy when you live with him. And I'm tellin' you now that Peter is not good enough for a sweet little kid like you. He has a dozen skirts after him all the time, like the moths around that light over there. Why? Because he kids 'em along and makes each one think she's the berries for him. D'you know how he's payin' his way through school? On the money he gets from rich dames like you! Has he touched you for a payment yet?"

"You are despicable," Camilla told him in a deadly calm voice. "I don't believe a word you are saying and I refuse to listen any longer!"

"Oh, yeah?" his laugh was ugly. "I'll bet you are beautiful to look at when you're mad like that. I told you I'm crazy about you and I meant it. If Peter is good enough for you, so am I—" and before Camilla was aware of what was happening, his arms were holding her like a vise and his mouth was seeking hers while she struggled violently to free herself.

From behind them, a doubled hand struck out swiftly against the side of Gus' head and sent him sprawling upon the ground. At the same time, another arm grasped Camilla's shoulders and prevented her falling from the force of the blow that separated them.

"Did he hurt you, dear?" Peter was breathing hard, with anger and exertion.

"No, but I hope you have hurt him." She was trembling, too, with anger. "Not because of me but for what he was saying about you."

"I heard enough," Peter said curtly, "which doesn't matter." But I'm sorry I am responsible for introducing you to such a bum.'

He walked around the bench and stood above Gus, who rolled over then and put his hand tentatively to his bruised jaw. Peter assured himself that his victim was only stunned, stood up and adjusted his own tie and clothes, and took Camilla's arm.

"Shall we go back to the party and forget this unfortunate affair? Glad I came out here to look for you. I missed you and had already lost one dance with you, for I suspected something was wrong." He was trying to dismiss the incident and sound casual, but his voice still shook uncertainly. "I know you wouldn't voluntarily cut the dances you had promised me."

"But, Peter, he said those terrible things about you!" She was still trembling with her own resentment,

for SCIATICA
Wash the painful part well with warm water; then rub in plenty of Minard's and you'll feel better!
33
MINARD'S "KING OF PAIN" LINIMENT

and wondered how Peter could dismiss the thing so calmly.

"But you don't believe them, darling?" he asked quietly.

"Of course not!"

"Then, that's all that matters. You know, the world has so many people in it that there just have to be some like that—ungrateful and jealous and malicious. But time is too precious to waste even thinking about them. From now on, we'll just forget Gus. People like that just hang themselves with their own rope. He can shift for himself, as he did before I took pity on him. At least, that's one load off my mind!"

"Do you mean," Camilla was incredulous, "that you have been keeping Gus—?"

"Most of the time, he shrugged indifferently.

"And he could say that!" she exclaimed with dismay. "Well, this world surprises me a little more every day—the people, I mean."

"Sure, the world is fine. It's the people—regular hodge-podge. Interesting, though," he added thoughtfully. "Every good or bad surprise I have over human nature makes me feel a little bit wiser and more able to cope with it in general. As Tennyson said, 'I am a part of all that I have met'."

"Oh, Peter, you're so fine yourself," she told him with loving admiration, "that you can find some good in everything."

He pressed her hand that was tucked into his arm, as they walked slowly back to the auditorium. "That's because you think so, honey," he told her with characteristic modesty.

* * * * * *

The last balloon had escaped ceilingward, many of them were deflated and had dropped to the floor which was strewn with confetti, serpentine dangled limpy in mid-air, and the orchestra had crooned goodnight.

Peter Was Breathing Hard From Anger And Exertion.

Again, they were waking through the park, arm in arm. It was that witching hour when the young moon rides high and gloriously, when the air is sweetly caressing and the sounds of the night whisper and echo mysteriously like conspirators of romance. The moonlight stretched a silver path across the lagoon, down which tiny ripples rode gleefully with the breeze. Somewhere, a pair of birds had just finished the building of their nest and twittered sleepily, and an adventurous frog gave a frightened croak and leaped into the water with a thudding splash.

Camilla chuckled softly. "Poor thing! Perhaps he was on his way to see his girl friend and we frightened him so he never will have the courage to try again."

"Too late, anyway, to start out adventuring," Peter laughed. "He should be taking her home, as I am—and wish I didn't have to," he added softly, drawing her closer with the arm that held her.

"You don't wish that more than I do, Peter!"

"Precious! But that's not the worst of it. Lord knows how many more years I'll have to be taking you home and leaving you, forlornly.

"Not years, darling!"

"It will be, unless things happen a lot faster than I have any right to expect."

"But why do things have to happen—before we can have each other?"

"So I'll be able to take care of you, of course. Sometimes," he sighed heavily, "I'm afraid that never will be."

"Why, you dear, foolish thing, you talk as if I were going to be a burden to you!"

AFTER 50
Scott's Emulsion is a great comfort. It warms, strengthens, enriches the blood. The emulsifying process makes it easy to digest.
10-32
SCOTT'S EMULSION
RICH IN VITAMINS

"Never that!" he protested. "But, you know—"

"I know nothing about letting you take care of me, Peter, this is the day of women's freedom, you know, freedom from the bane of idleness that makes them burdens to men. You don't have to take care of me, just because you love me."

"And that is just why I do want to take care of you. That is the test of a man's love, whether or not he wants to cherish and protect a woman. It's all right for women to be free and independent—free to escape from the guardianship of men if they wish. But when a woman falls in love, she goes right back to the beginning of things again— service and submission and dependence. She can't escape it. And the man who loves her in the right way, wants to take care of her, to endow her with his worldly goods. It is part of his vanity."

"Of course, but all of that is in our future, dear, and for people whose situation is different from ours. I'm talking about us, now. Why should you grieve and worry over not being able to provide for me, when you should be giving the best of yourself to your work toward success?"

"But what else can I do?" Now that I've found you, I can't forget you—not for a minute. Oh, Camilla, I need you so—"

He stopped abruptly to kiss her. "How can we go on like this—for years?" his voice yearned.

"We can't," she whispered, "and we'll not."

"What do you mean?" he demanded.

(To Be Continued.)

Saskatchewan Fire Loss

Province Shows Lowest Loss In The Dominion

Within the three years preceding 1932, Saskatchewan's fire loss per capita decreased from $5.50 to $1.82 and during that time the province dropped from sixth highest to the lowest in the Dominion in the matter of fire loss per capita, Hon. J. F. Bryant, K.C., Minister of Public Works, announced. He was addressing delegates to the Regina and South Saskatchewan inspectorate of the Rural Teachers' Association Convention in Regina.

Two-fifths of Brazil's new coffee crop is to be destroyed.

Foot Guards Won Out

Regiment Of King George Can Now Ignore Traffic Light

King George of England's proud regiment of foot guards has just won a big peace-time battle without firing a shot.

Maybe the victory will not be chalked up on the regiment's official battle-roll, but all the same the guards are very jubilant, for their conquest means that in future they will not have to obey London's intricate system of traffic signal lights when on the march to the capital.

The first skirmish occurred two years ago when traffic lights were first coming into use on a big scale here, and an impertinent light in Regent St. decimated one of the regiment's proudest battalions.

Guardsmen were up in arms at this affront. Not even Napoleon was able to cut up the guards, they said in effect, and they saw no reason why a little red light should be able to do it without protest.

Then a few weeks later another battalion lost its drum major through another warlike act on the part of a traffic light. The drum major matter ed on proudly, twirling his ceremonial staff. Imagine his dismay when he discovered he had become a mere unit of one, that the rest of his colleagues had had their advance stemmed by a mere red lens.

The last straw came when the police commissioner announced he had approved the erection of 440 traffic lights at crossroads throughout the capital.

Declaring that so many lights would mean that the guards would be confined to barracks forever, the military authorities took the matter in hand. First they were furnished with maps showing how they could avoid routes in which red lights were operating, but this involved gruelling marches.

Then they began by giving 24 hours' notice of their intention to march, which smoothed away many of the difficulties.

Now they have scored a final victory. In future a traffic officer will be stationed at every signal light when the guards are out marching, and the officer will have orders to disconnect the signals until the troops have passed.

Never again will His Majesty's guards be cut up.

THE RHYMING OPTIMIST

By Aline Michaelis

OF SMALL THINGS

A little hill can hide the boundless ocean,
A scrap of cloud can shut away the stars,
A creeping doubt can dim long years' devotion,
An hour of sin a whole life's virtue mars.

Who doubts the oak is in the acorn hidden
Or that today holds keys to days to be be,
That far events which wait for us, unbidden,
Arise from choice which binds nr sets us free?

Since fleeting cause can wreak such dire disaster
He who is wise holds naught too slight to heed;
Of small things, as of great he will be master
Expressing truth in his most trivial deed.

An Anti-Bandit Gadget

Invention May Lead To Lower Insurance For Cars

Cheaper insurance for motor cars is likely to be one result of an anti-bandit gadget invented by ex-Chief Inspector Wensley, of Scotland Yard.

The device, which is being manufactured in the midlands, consists of a steel-slat shutter bearing in bold letters the word "Parked." It pulls down like a blind behind the windshield and automatically becomes locked.

A car thief would have to use strong tools to remove it.

Prominent insurance brokers and companies have decided that motorists using the shutter will be able to secure a reduction of 15 per cent. off the premiums for all private cars and commercial vehicles.

Princess Mary Better

The Princess Royal, the Countess of Harewood, has practically recovered from her recent illness, but she is debarred from undertaking public engagements for another month. She recently inspected Broadcasting House, the new headquarters of the British Broadcasting Corporation, but it was a personal visit and in no way a public ceremony.

Men are becoming ardent patrons of London department store bargain sales.

Little Helps For This Week

"As we have therefore opportunity, let us do good unto all men."—Galatians 6:10.

I ask Thee for a thoughtful love,
Through constant watching wise,
To meet the glad with joyful smiles,
And to wipe the weeping eyes,
And a heart at leisure with itself,
To soothe and sympathize.
—A. L. Waring.

Surely none are so full of cares or so poor in gifts that to them also, waiting patiently and trustfully on God for His daily commands, He will not give direct ministry for him, increasing according to their strength and desire. There is so much to be set right in the world, there are so many to be led and helped and comforted, that we must continually come in contact with such in our daily life. Let us only take care that by the place being turned inward or strained onward we do not miss our turn of service, and pass by those to whom we might have been sent on an errand straight from God.—E. Charles.

Look up and not down, look forward and not back, look out and not in, and lend a hand.—Edward E. Hale.

One Of Queerest Trades

Professional Writer Of Speeches Has Office In London's Famous Strand

Entitled to a high place on the membership list of the club of queer trades is surely the professional writer of speeches who occupies a sky-lighted office in London's famous Strand. His enterprise and originality have at all events brought him success, for since his idea was first put into practice, a few years ago, he has written hundreds of speeches on the most diverse subjects. Titled and professional folks of all sorts apply to him. For the most part, however, his clients' requirements are of a more ordinary nature, and consist of demands for after-dinner speeches, and addresses for bazaars, presentations and similar functions. Then the writing of political speeches at times also forms a considerable part of the nimble speech-writer's activities, and on many occasions he has been called upon to write both "for" and "against" the same party and subject.

New Kind Of Sky-Writing

Partially Frozen Smoke Makes Messages Legible For Longer Period

Successful tests of messages in smoke frozen on the face of the sky have been made in England and it is believed that they soon will be a familiar feature of daily life. The airplanes producing these messages work at a height of 20,000 feet so that the pilots have to wear electrically heated suits. The intense cold at this altitude partially freezes the smoke as it comes in contact with the air, and thus makes the messages legible for a longer period than usual. Also at 20,000 feet atmospheric disturbances are less. Night sky-writing by means of a new searchlight projector throws colored patterns on the clouds.

Queer Idea For Holiday

Young Englishman Crossed Ten Deserts In Lone Motor Trip

Ideas for holidays vary. Nicholas Boonin's tastes were expressed in a lone motor trip through India, Asia, North Africa and Europe, crossing ten deserts on the way, with only a thermos flask of water in his car. He is a young mines manager on leave. He has just reached London, England, and his speedometer registers a journey of 11,668 miles. He claims that he has made the first solo car journey ever attempted over this route.

Drive Against Tipping

"Down with tipping" is the slogan of a new organization of artists, writers and publishers in Paris. It is the start of a campaign to enforce the abolition of tips under all circumstances, and to replace them by salaries paid by the employer or by percentages on the money collected by the employees.

Pigeon Sought First Aid

When lost in a fog a pigeon took refuge on a ship in the Bay of Biscay in an exhausted condition. The owner lost hope of recovering it, but a few days later it came back with a message tied to it which told him that it had been fed and cared for.

New Coal For Fireplace

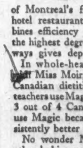
A new chemically-treated coal for the open fireplace burns with a pine-scented odor, and another new kind produces flames in any color to match the decorative plan of the room.

CHICKEN SHORTCAKE

2 cups pastry flour
(or 1¾ cups of bread flour)
3 teaspoons Magic Baking Powder
½ teaspoon salt
4 tablespoons shortening
1 egg ½ cup water

Sift dry ingredients; add shortening and mix in thoroughly with a steel fork; add beaten egg and sufficient water to make soft dough. Roll or pat out with hands on floured board. Cut out with large floured biscuit cutter, or half fill greased muffin rings which have been placed on greased baking pan. Bake in hot oven at 475° F. about 12 minutes. Split and butter while hot, and fill with hot creamed chicken. Makes 6 shortcakes.

Try Miss Alice Moir's light, flaky
Chicken Shortcake



"I always use and recommend Magic Baking Powder," says Miss Alice Moir, Dietitian of one of Montreal's finest apartment-hotel restaurants. "Magic combines efficiency and economy to the highest degree. Besides, it always gives dependable results."

In whole-hearted agreement with Miss Moir, the majority of Canadian dietitians and cookery teachers use Magic *exclusively*. And 3 out of 4 Canadian housewives use Magic because it gives consistently better baking results.

No wonder Magic outsells all other baking powders combined! Favour your family with Chicken Shortcake—made with Magic as Miss Moir directs. Note its delicate flavour, its feather lightness!

Free Cook Book—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ont.

"CONTAINS NO ALUM. Thiscertificate is issued on every tin to your guarantee that Magic Baking Powder is free from alum or any harmful ingredient.
Made in Canada

Boy Scouts On Long Trip

In an old and poorly equipped yacht, two Polish Boy Scouts have sailed from Casabianca, Morocco, and are headed southwards along the west coast of Africa. They have sailed across the Baltic, the North Sea, the channel and the Atlantic in their vessel, known as the Zjawa. In Casablanca they met Alain Gerbault, the famous lone yachtman, whose adventures they are trying to emulate.

Children of Britain are turning from German dolls to toys made at home.

Improved economic conditions are inspiring farmers in Peru to plant more cotton.

IN LOVING MEMORY

Gone from us, gone forever,
Here with us no more thou art;
Suddenly it came upon us.
With thee we had to part
We miss the sunshine ofthy face
Thy fond and earnest care;
Our home is dark without thee,
We miss thee everywhere.
In loving memory of a dear wife and mother who died Nov. 2nd, 1931. Ever remembered by her loving husband, sons and daughters. Mr. Fred Jones and family.

EDITORIAL

It will be good news to the average citizen throughout the province to learn that the Powletts—father and son—were successful in winning their case against the University of Alberta. The Powletts sued the University for $200,000 claiming that the son became insane through initiation proceedings shortly after he entered the University in 1932. They got judgment for $56,860. It is hoped this will be a lesson in future to both University officials and sophomores. Some of the antics indulged in by students in these proceedings in the past have been disgraceful, dangerous, immoral and barbaric and they have been all the more disgusting since they have been indulged in by young men who are supposed to be in search of cultural training.

o

The passing of Mr. J. E. Tarrant last week removes from Redcliff another link between the early days of the town and the present. As one of the first residents of the town the late Mr. Tarrant was called upon on many occasions for information concerning early happenings. His retentive memory for names and events and his talent for accuracy in dates caused him to be looked upon as an authority in this line and many an argument over early days was left to him for settlement.

The late Mr. Tarrant was a friend to everybody and it had often been said of him that he had not an enemy in the world. He was kind hearted and thoughtful for others to a degree of personal sacrifice and we know of no higher tribute that can be paid to any man.

Joe Tarrant will be greatly missed by a large circle of friends who mourn his untimely

o

Now that the several local organizations have entered into their usual fall and winter activities, the Review would greatly appreciate it if the secretary of the several organizatons would keep us posted on their activities We will be pleased to give them every possible encouragement and support but we can't do this without knowing what they are doing, and as our reporting staff is limited we will have to depend on the secretaries for our information. A real live secretary means a real live organization and he or she also helps make the local paper more newsy. It is a case of "You scratch our backs and we'll scratch yours."

o

The sudden death of W. J. Bowser, an ex-premier of British Columbia and who has been a leading figure in the present general election campaign in that province, has greatly added to the bad political mixup in the coast province. However recent reports would indicate that the incident is having the effect of bringing the several opposing groups closer together. The result of the campaign in B. C. will be closely watched.
